Dwyer. **DIFFERENTIAL PRESSURE PISTON-TYPE GAGE**

Excellent Accuracy and Over-Pressure Ratings

The SERIES PTGD Differential Pressure Piston-Type Gage can be used to measure the pressure drop across filters, strainers, pump performance testing, and heat exchanger pressure drop monitoring. Its simple, rugged design possesses weather and corrosion resistant gage front with a shatter resistant lens. The Series PTGD ranges with full-scale accuracies of $\pm 2\%$. Constructed with aluminum or 316SS and available with two 1/4" female NPT end connections, the Series PTGD provides overrange protection rated to 3000 psig (200 bar) or 6000 psig (400 bar) depending on model. Standard models come with in-line connections. Back or bottom connections are also available.

- Rugged, weather and corrosive proof design supports use in harsh environments · Over-protection range depending on model, up to 6000 psig (400 bar) allows highpressure applications
- · Flexibility of connection selection fits the most sophisticated designs
