

IO-Link Data Reference Guide: QS18 Expert Receiver

IO-Link Data Map

This document refers to the following IODD file: Banner_Engineering-QS18EK6R-20190831-IODD1.1.xml. The IODD file and support files can be found on www.bannerengineering.com under the download section of the product family page.

Communication Parameters

The following communication parameters are used.

Parameter	Value	Parameter	Value
IO-Link revision	V1.1	Port class	A
Process Data In length	32 bits	SIO mode	Yes
Process Data Out length	N/A	Smart sensor profile	Yes
Bit Rate	38400 bps	Block parameterization	Yes
Minimum cycle time	3.6 ms	Data Storage	Yes

IO-Link Process Data In (Device to Master)

Process Data In is transmitted cyclically to the IO-Link master from the IO-Link device.

The QS18 Expert IO-Link Process Data is 32 bits in size and includes the state of the output channel and the health state of the sensor. This information is sent to the IO-Link master every 3.6 ms.

Process Data Input			
Subindex	Name	Number of Bits	Data Values
1	Output State	1	0=Inactive, 1=Active
2	Health State	1	0=Inactive, 1=Active
3	Marginal Light State	1	0=Inactive, 1=Marginal Light
4	Marginal Dark State	1	0=Inactive, 1=Marginal Dark
5	Normalized Signal Strength	10	NSS Value 0-990, 999
6	Process Data Input Configuration	16	Value depends on "Vendor Specific Configuration.Process Data Input Configuration" Selection Choice 1 - Signal Choice 2 - Count Choice 3 - Duration Choice 4 - Events per Minute

Octet 0								
Subindex	6	6	6	6	6	6	6	6
Bit offset	31	30	29	28	27	26	25	24
Value	0	0	0	0	0	1	1	0

Octet 1								
Subindex	6	6	6	6	6	6	6	6
Bit offset	23	22	21	20	19	18	17	16
Value	0	1	0	0	1	0	1	1

Octet 2								
Subindex	////	////	5	5	5	5	5	5
Value								

Octet 2								
Bit offset	15	14	13	12	11	10	9	8
Value	N/A	N/A	1	1	1	1	0	1

Octet 3								
Subindex	5	5	5	5	4	3	2	1
Bit offset	7	6	5	4	3	2	1	0
Value	N/A	1	1	0	1	0	0	1

Based on the values in the example tables:

- Output State: Active
- Health State: Not healthy
- Marginal Light State: Inactive
- Marginal Dark State: Marginal dark
- Normalized Signal Strength: 990
- Process Data Input Configuration (Signal): 1611

IO-Link Process Data Out (Master to Device)

Not applicable.

Parameters Set Using IO-Link

These parameters can be read from and/or written to an IO-Link model of the QS18EK6R/RV sensor. Also included is information about whether the variable in question is saved during Data Storage and whether the variable came from the IO-Link Smart Sensor Profile.

Unlike Process Data In, which is transmitted from the IO-Link device to the IO-Link master cyclically, these parameters are read or written acyclically as needed.

Index	Sub-index	Name	Length	Value Range	Default	Access Rights	Data Storage?	Smart Sensor Profile	AOI

66-68		<i>unused</i>							
69		All Time Run Time (hrs)	32-bit integer			ro			y
70		Resettable Run Time (hrs)	32-bit integer			ro			y
71		Quality of Health (The current adapted switching threshold normalized to original taught signal)	8-bit uninteger	0-200		ro			y
72		Normalized Signal Strength (The current signal strength normalized to the current switching threshold)	16-bit uninteger	0-990 = non-saturated 999 = saturated signal		ro			y
73		Quality of Teach The original taught signal normalized to 1.5 times the minimally acceptable teach value. A value of 100 or higher is a reliable teach condition. Less than 100 means that the sensor has less than a 50% signal strength reserve. The quality of teach is a snapshot of the teach process and does not change until the sensor is taught again. Optimizing sensor to target alignment can result in higher values.	8-bit uninteger	0-200		ro			y
74		Health Thresholds							

Index	Sub-Index	Name	Length	Value Range	Default	Access Rights	Data Storage?	Smart Sensor Profile	AOI

84		Raw ADC Signal	16-bit uinteger	0..65535		ro			y

IO-Link Events

Events are acyclic transmissions from the IO-Link device to the IO-Link master. Events can be error messages and/or warning or maintenance data.

Code	Type	Name	Description
25376 (0x6320)	Error	Parameter Error	Check datasheet and values
36000 (0x8ca0)	Warning	All-time Run Time Event	Event indicating the corresponding configured running time has elapsed
36001 (0x8ca1)	Warning	Resettable Run Time Event	Event indicating the corresponding configured running time has elapsed
36003 (0x8ca3)	Notification	Teach Completed Event	Event indicating a teach has been completed
36005 (0x8ca5)	Notification	Teach Point Coerced Event	One or more taught positions were outside the sensing range of the device
36006 (0x8ca6)	Notification	Teach Offset Causes Coercion Event	Applying the configured teach offset would place the setpoint outside the range of the device
36006 (0x8ca7)	Notification	Teach Cancel Event	Event indicating a teach has been canceled
