

BACK PRESSURE REDUCING VALVE

The LowFlow JB Series line of back pressure regulators have the ability to handle very high pressures and very low flows. These valves are typically used in research and sampling systems for corrosive and specialty gases. Typical applications include gas chromatography and flame ionization detectors, as well as other industrial controls.

Features:

- Top entry design facilitates in-line cleaning and maintenance
- Barstock construction guarantees material integrity and surface finish
- High flow rate coupled with high rangeability reduces need for reduced trim sizes
- Optimized internal volume
- Proprietary Jorlon diaphragm material provides exceptionally long life
- Soft seat material for ANSI Class VI shutoff.

JB SERIES SPECIFICATIONS

Line Size: 1/4", 3/8", 1/2" (DN8, DN10, DN15)

End Connections

- Threaded
- Socket Weld
- Flanged

Soft Seat Materials for ANSI Class VI Shut-off

- PEEK to +350°F (+177°C)
- Kel-F to +250°F (+121°C)

Seat-To-body O-Ring:

- Viton standard
- Consult factory for other materials

Body Material

- 316L SST Standard
- Contact factory for other body/trim/seat materials

Diaphragm Material: Jorlon

Maximum Inlet Pressure: 1000 psig (68,9 bar) @ -20°F (28,9°C)

Pressure at Maximum Temperature:

- 1000 psi @ 350°F (68,9 bar @ 177°C) with PEEK seat
- 1000 psi @250°F (68,9 bar @ 121°C) with Kel-F seat

Spring Ranges

- 5-50 psi (0.3-3.4 bar)
- 25 100 psi (1.7 6.9 bar)
- 50 150 psi (3.4 10.3 bar)
- 75 250 psi (5,2 17 bar)
- 100 475 psi (7 33 bar)
- 200 − 750 psi (14 − 52 bar)

Flow Characteristics

- Cv 0.05
- Cv 0.15
- Cv 0.25
- Cv 0.35

Options

- Panel Mounting
- Captured Vent
- Locking Wire
- Tamper Proof
- Lockout Device

OPTIONS & DEFINITIONS

Panel Mount The panel mount feature utilizes a threaded spring housing and a panel mount ring to secure the regulator to an instrument panel. This option requires a 1-1/2" panel cut out.

Captured Vent The captured vent design provides maximum safety for the user when handling toxic or hazardous media. It features a 1/8" FNPT port located on the spring housing. The user can easily tube this vent to a safe location. This option can be incorporated into a self-relieving regulator that provides an additional port to permit the safe expulsion of hazardous media.

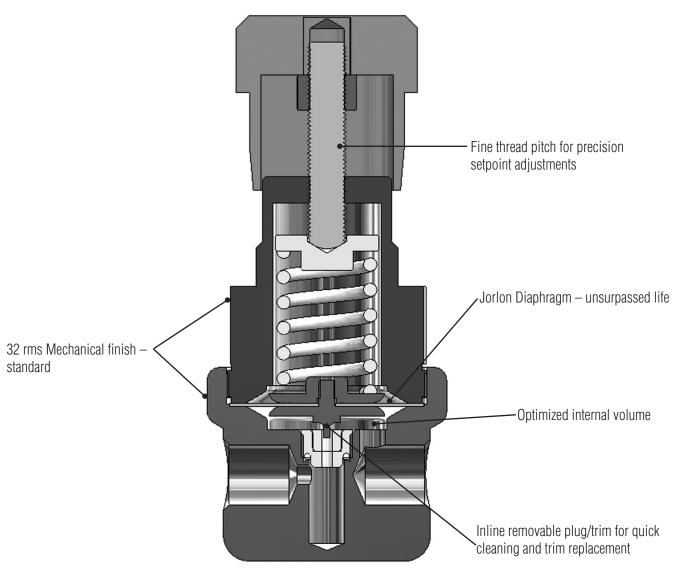

Locking Wire The locking wire option utilizes a lead sealed metal wire to physically hold the adjusting screw in place to prevent any unwanted set point changes.

Tamper Proof The tamper proof option replaces the standard adjusting knob with a stainless steel acorn nut.

Lockout Device The lockout device is a 2 piece polypropylene enclosure which encapsulates the adjustment knob and prevents unwanted set point changes. The part number required for this valve is 26970. (Lock not included)

JB SERIES FEATURES & BENEFITS

Sizing

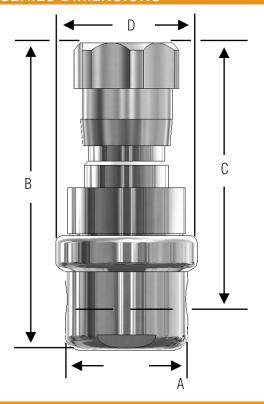

- 1. Use the "LVCV Sizing Software" link found on the www.lowflowvalve.com home page and navigate to LowFlow valve sizing.
- 2. Use the software to find the appropriate CV for the customer's application conditions.
- 3. LVCV will tell you the CV needed to pass the required flow. Because the JB works best under 50% capacity, you need to select an install CV for the valve that is at least two times larger.

Example:

Air, ambient temperature, P1 = 200 psi, P2 = 0 psi, 1/2° schedule 40 pipe, flow rate 800 scfh Using LVCV to size for CV we find that these conditions require an actual CV of 0.11. Calculating for less than 50% capacity we then multiply the result by 2x (0.11 x 2 = 0.22). This means that we should install the 0.25 CV to optimize the valve for the conditions.

JB SERIES DIMENSIONS

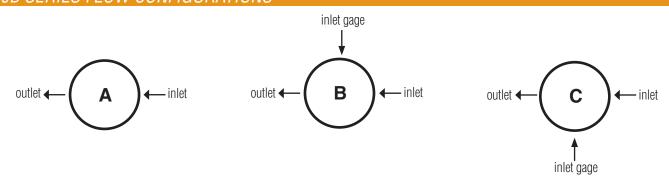

• JB Series, Inches

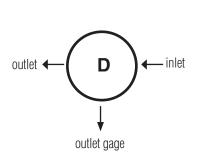

VALVE	DIMENSIONS, INCHES WEI								
SIZE	A	В	C	D	LBS				
1/4"	2.00	5.03	4.20	2.31	3.4				
3/8"	2.00	5.03	4.20	2.31	3.4				
1/2"	2.75	5.03	4.20	2.31	4.2				

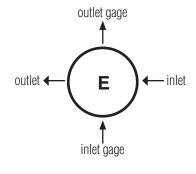

• JB Series, Metric

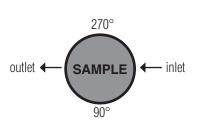

VALVE		DIMENSIONS, MM						
SIZE	A	В	C	D	KGS			
DN8	50,8	128	107	58,7	1.5			
DN10	50,8	128	107	58,7	1,5			
DN15	69,9	128	107	58,7	1,9			

JB SERIES FLOW CONFIGURATIONS

^{*}Gage ports are 1/4" FNPT (consult factory for required alternative)
Other porting options are available at www.lowflowvalve.com under the resources tab
