# Pro Visual Platform

Give your machines a voice

Select color and animation options to allow for more intuitive indication in your facility

Gain control of your supply chain

Standardize on one model to simplify parts lists and purchasing

Customize indication and illumination to maximize productivity

Provide information and light so workers, equipment and processes can interact smoothly

BANNER ®

more sensors, more solutions

Strip Lights

- Configure color, flashing, animation and intensity
- 13 colors plus 6 whites in six different length with two window options
- Standard illumination and indication plus timer, counter, distance and gauge modes
Tower Lights

- Configure color, flashing, rotation and intensity for each segment
